

# A good first impression

Personal websites

Nathaniel Budijono

- Why make a personal site?
  - A blog
  - Your resume + more!
- Why GitHub Pages?
  - It's free
- Why Hugo?
  - It's easy 'cause Markdown is easy
  - It works well with GH Pages

# Before we begin

Do the pre-workshop stuff

- Create a GitHub account
- WSL or use a Mac
- Install git
- Programming interfaces
  - VSCode
  - Sublime
- Install Hugo and its dependencies
- Pick a theme

# Deploying to the interwebs

- See [this](#) for help
- You should have your site live on the internet at `https://your-github-username.github.io`
- If you buy a domain, you can use it also
